SEPT. 11 EVENTS WERE ENGINEERED AT HOME**

A number of scientists say mushrooming clouds and the appearance of "squibs" below the collapse wave (arrow points to one of many examples) indicate the Twin Towers were demolished with explosives. They also point to the collapse hours later of a third skyscraper not hit by an airplane, WTC 7, in what looked like a perfect controlled implosion. Official studies have refused to entertain the demolitions hypothesis. Recommended Web sites: wtc7.net, 911review.com

UK Cabinet Notes: US Planned to Fake Iraqi Provocation

LONDON - Minutes from a British war cabinet meeting of July 2002 reveal that the Blair government knew the Bush administration intended to invade Iraq already at that time - regardless of the outcome of ongoing international talks.

"Bush wanted to remove Saddam, through military action, justified by the conjunction of terrorism and WMD," Britain's defense liaison to the United States told Prime Minister Blair, according to the minutes. "But the intelligence and facts were being fixed around the policy."

The "Downing Street Minutes" were released in May 2005 but have barely made a ripple in the US media.

The same meeting also heard a report on two US military options for the coming invasion. Plan B, which was not chosen, involved a "Running Start. Use forces already in theatre (3 x 6,000), continuous air campaign, initiated by an Iraqi casus

belli. Total lead time of 60 days with the air campaign beginning even earlier. A hazardous option." (Italics ours.)

This raises an interesting question that the press has yet to pose: How does one plan for an Iraqi "casus belli" (meaning, an initiation of hostilities by Iraqi forces)? Was the Pentagon prepared if necessary to fake an Iraqi attack on US forces?
